

Screening & Illness Guide

Please screen your camper daily before coming to camp. Is your camper experiencing:

At least 24 hours must pass after the resolution of a fever, without use of medication, before a camper may arrive at camp - regardless if any other symptoms are present.

Camper Close Contact Guide

What is close contact? Your camper is a “close contact” if **ANY** of the following situations happened to them while they spent time with a person with a confirmed case of COVID-19, or in the 48 hours prior to the positive case developing symptoms.

- Had direct physical contact with the person (e.g. hug, kiss, handshake).
- Were within 6 feet of the person for more than 15 minutes, even if wearing a mask.
- Had contact with the person’s respiratory secretions (e.g. shared a drinking glass).
- Stayed overnight for at least one night in a household with the positive case.

Scenario 1

Someone in your household (parent/guardian, another child, etc.) is COVID-19 positive.

Your camper should stay/go home. You should notify GSNWGL right away.

Scenario 2

My camper’s aunt is COVID-19 positive and my camper ate with her yesterday. (My camper was within 6 feet of her for more than 15 minutes).

Watch for symptoms and **quarantine for 14 days** from your last contact. If you cannot isolate from the positive person within the home, the last day of their quarantine becomes the first day of your **14 day extended quarantine (24 days total)**.

Scenario 3

My camper’s aunt is COVID-19 positive. My camper spent time with her indoors, physically-distanced, fully-masked, for less than 15 minutes yesterday.

Your camper can return to camp. Your camper should continue to practice physical distancing, masking and monitoring for symptoms.

You are excused from having to quarantine ONLY if: you have been COVID-19 positive within the last three months, have dated medical proof of your results, have recovered, and are no longer symptomatic.
